EXPERIENCE

Graphic Designing Intern

Canadian Imperial Advantage

July 2023 - August 2023,
Edmonton, AB

- Created visually compelling posters and advertisements for Instagram, enhancing brand visibility and engagement.
- Managed up to 5 projects simultaneously, meeting tight deadlines and ensuring high-quality deliverables.
- Created projects very closely with the Marketing Team to develop and execute promotional strategies and campaigns.
- Designed eye-catching social media graphics, ensuring consistency with brand guidelines.
- Collaborated with cross-functional teams to produce marketing materials, including brochures, flyers, and banners.
- Conducted market research to stay updated on current design trends and competitor activities.

School Library Assistant

Harry Ainlay High School

September 2022 - January 20
Edmonton, AB

- Organized and cataloged books and resources, ensuring easy access and efficient retrieval for students and staff.
- Assisted students and teachers with any troubles they ran into while researching for their projects, providing exceptional customer support and resolving issues promptly.
- Managed the library's help desk, responding to requests for assistance with research, technology, and finding appropriate resources.
- Developed and maintained a welcoming atmosphere in the library, fostering a supportive environment for all users.
- Provided technical support for library computers and digital devices, assisting users with troubleshooting and usage.

PROJECTS

FXN - Flutter App/Firebase Backend

June 2024 - July 2024

- A mobile social media application that allows users to post events and parties they are hosting.
- Able to discover other events that are being hosted by the people they follow.
- Implemented authentication, profile customization, and posting.
- Plans to move to a Golang backend when the structure of the app is more solidified as using a relational database like SQLite, MySQL, or PostgreSQL would be more efficient for our use case.

Transit Monkey - Flutter App/Golang Backend

April 2024 - June 2024

- A trip planning and transit info app based around ease of use and convenience.
- Fully implemented backend API built in Golang based on efficiency.
- CLI database builder used by the server to convert a GTFS zip file into an SQLite database so the database can be built on any server.

EDUCATION

Bachelor of Science in Computer Science

University of Alberta, Augustana | Expected Fall 2025 - Expected Spring 2029 | Camrose, Alberta

High School Diploma

Harry Ainlay High School | Fall 2022 - Expected Summer 2025 | Edmonton, Alberta
